

Bugsy's Story

"My dog Bugsy had an ulcer in his eye that was causing a lot of pain and discomfort. His eye was watering constantly and he wouldn't stop rubbing it. After a distance reiki session with Donna he was much better. The watering stopped and he was no longer trying to rub his eye. He was calm and comfortable. He still required surgery on his eye to remove the ulcer. The day following surgery Donna did another distance Reiki session. His recovery was much quicker than the vet expected, and I believe it was due to the Reiki healing.

A couple of months later Donna and I performed a cleansing ritual at my home. I had put Bugsy in his kennel because he has terrible manners with guests. He was unusually quiet during the hour-long ritual. When we were done with the cleansing Donna asked if I would let Bugsy out to meet her in person. I was hesitant because I was certain he would be hyper and jump on her, but I agreed. Although he was visibly very excited, Donna asked him to sit and he did. She put her hand on top of his head and said "Hi Bugsy – we've met before. Do you recognize my energy?" It was clear he knew they had met during the remote Reiki sessions. He has never been calm or remained seated when meeting someone for the first time. I was blown away." – **L.P.**
